Flows

The step-by-step checklists every invoice follows. Build once, reuse for every invoice of that type.

+ New flow

Editing a published flow creates a new version. Invoices already running keep the version they started on. New invoices use the latest version.

Standard delivery

Published v3

Goods delivered by our own vehicle. Email sent to the party.

Describe your process

Like Courier delivery, but the customer pays an advance first, and we need a photo of the delivered goods.

I started from **Courier delivery v2** and made 3 changes. Review each one on the right. Nothing is saved to a published flow.

- [x] **Add step 2:** Advance payment received, with amount, date, reference and a proof upload
- [x] **Change step 4:** add a required Photo of delivered goods
- [x] **Keep** the other 5 steps unchanged

One question

Who should be allowed to complete "Advance payment received"?

Admin and Builder | Admin only

Skip the email step | Make proof optional | Add a damage check

Ask for changes — Send

Draft compared with Courier delivery v2
